

Subject: **Manufacture Declaration on Change in FCC ID**
FCC ID: WVS-TP5-J01

To Whom It May Concern:

We declare the change in FCC ID and the differences from the original model.

The original model's FCC ID is "SP2-TM5-E01" and it is changed due to the language change from English to Japanese.

The changes between two models are the battery cover printing and Java and A-GPS. Hence there is no hardware change between both models.

Also Java application and A-GPS application are removed from the software of the new model, Which FCC ID is "WVS-TP5-J01", due to the Operator's customization, and those can not be re-installed by the end users.

Sincerely,

Takao Kamei
